Profile
Highly motivated, second year computer science student with excellent experience in front-end development and growing understanding of back-end technologies. Proficient in multiple programming languages and passionate about creating user-friendly and efficient software solutions. Looking for a technology related position where I can apply my skills, problem-solving and collaborative abilities.

Experience
Warehouse Operative - Belle Lingerie, Cleckheaton
May 2024 - Aug 2024

- Helped regulate and maintain stock by updating the DBMS records and reported any discrepancies.
- Picked orders from the warehouse and decreased my time it takes by up to 50% in under a month.
- Worked closely with team members to meet daily targets and maintain a smooth workflow.

Factory Operative — Morley Glass, Morley
Sep 2021 - Jul 2023

- Responsible for operating machinery effectively to maintain good workflow
- Undertaking Day to Day duties set by my supervisor to high standards
- Working alongside other employees and building/maintaining good work relationships and communication

Education
University of Huddersfield
Bachelor of Computer Science
Huddersfield, West Yorkshire

2023 - Present

Wakefield College
Extended L3 in Digital Industries - Distinction
Wakefield, West Yorkshire

2021 - 2023

Projects
GuitarPal - React Native
Developing a mobile application using React Native and Typescript which helps monitor Acoustic Guitar temperature and humidity, and measure tuning.

Planable - .NET
As a team leader, helped coordinate and develop an student finance calculator using .Net MAUI and the C# language.

Resurgence - Unity
Developed a combat flight simulator in unity with realistic simulated physics.
